MODEL SCHOOL.

PRIMARY GRADE.

FIRST YEAR.

READING.—Word and Sentence Method, first half the year. Monroe's First Reader second half the year.

NUMBER — Numbers 1—10 inclusive, according to Grube's Method. Numbers expressed to 30.

PLACE — Patterning, position words, right and left as fixed and relative terms, cardinal and semi-cardinal points.

SECOND YEAR.

READING—Monroe's Second Reader, with supplementary readings.

NUMBER — Numbers 10—100 inclusive, according to Grube's Method. Numbers expressed to 999 inclusive.

PLACE — Drawing to a scaled map of school room. School ground mapped and molded. Journey about the city.

THIRD YEAR.

READING—Monroe's Third Reader, with supplementary readings.

NUMBER — Multiplication and division tables, with concrete and abstract applications, addition, multiplication, subtraction and division, results not exceeding tens of thousands.

PLACE — City mapped and molded. Natural features described and named in connection with the above work. Imaginary journeys in different parts of the State. Imaginary journeys in different parts of the United States.

Music and Penmanship daily in each grade. Drawing, combined with Form, taught in each year. Lessons in Plants, Animals, Objects, Color, History and Human Body in each year.

INTERMEDIATE GRADE.

FIRST YEAR.

READING—Monroe's Fourth Reader to page 123. Special drill upon Articulation. Select Reading.

ARITHMETIC—Express numbers to billions and develop the term "period." Notation and the kinds of Notation. Numeration and reading numbers. Principles of expressing numbers by Roman Notation. Felter's Elements of Arithmetic, Addition, Subtraction, Multiplication, Division and U. S. Money. Oral Lessons in Fractions as far as twelfths, inclusive. Measuring and Comparing according to Grube's Method.

GEOGRAPHY—Journey Lessons continued. North America finished. South America, Europe, Asia, Africa, Indian Ocean, Australia and the Pacific. The Earth: form—real and apparent—proofs of real form. Rotation of the Earth: axis—day and night. Globe: hemisphere—poles—equator—parallels and meridians. Land and Water: natural features defined. Climate: zones defined and located. Characteristics of the vegetation and animals of the different zones. Wants of Man and how supplied. Places fitted for occupations. Commerce and location of cities. The Human Family: races and distribution.

LANGUAGE—Elementary Lessons in English (Heath) to page 95. Ideas developed applied in Composition Exercises.

COLOR—Review classes of Colors. Hues and their formation. Harmony of Color.

SPELLING—Oral and written exercises, using words in lessons recited. Phonic spelling with diacritical marks.

ORAL LESSONS—History, Botany and Minerals, used as the basis of Composition Exercises.

DRAWING—Walter Smith's Drawing Book, No. 1, with other exercises.

Daily exercises in Music and Penmanship.

SECOND YEAR.

READING—Monroe's Fourth Reader finished. Ideas of Accent and Emphasis developed. Exercises in marking emphatic words and accented syllables. Exercises in Articulation. Select Reading.

ARITHMETIC—Numbers: concrete and abstract—like and unlike—denominate. Finish Felter's Elements of Arithmetic. Felter's Intermediate to page 113.

GEOGRAPHY—Detailed study of the County, State and United States.

LANGUAGE—Elementary Lessons in English finished. Ideas developed applied in Composition Exercises.

SPELLING—Oral and written exercises. Phonic spelling continued. Classify words containing the regular vowel sounds and use diacritical marks.

DRAWING.—Smith's Drawing Books, Nos. 2 and 3.

ORAL LESSONS.—History, Botany, etc.

THIRD YEAR.

READING.—Exercises in Articulation, Emphasis and Inflection continued. Select Reading.

ARITHMETIC—Felter's Intermediate finished.

GEOGRAPHY—Detailed study of the Continents of North America, South America and Africa.

LANGUAGE—Parts of Speech and their uses.

SPELLING—Oral and Written Exercises. Occasional Vowel Sounds and Alphabetic Equivalents. Classify Words according to sounds.

DRAWING—Smith's Drawing Books, Nos. 4 and 5.

ORAL LESSONS—History, Botany, etc.

GRAMMAR GRADE.

FIRST YEAR.

READING—Monroe's Fifth Reader finished, supplemented by selections describing Natural Scenery of the Countries studied in Geography. Selections read leading into the study of Literature.

ARITHMETIC—Robinson's Practical to Applications of Decimals.

GEOGRAPHY—Detailed study of Europe, Asia and Australia.

LANGUAGE—Parts of Speech finished. Kinds of Nouns and Properties of Nouns and Personal Pronouns. Kinds of Adjectives and comparison of qualifying adjectives.

HISTORY—Dark Ages. Discovery of America. Rise of Leading Modern Nations. Short Course in Mythology. Lessons in Botany, Zoology and Minerals continued.

SPELLING—Swinton's Word-book commenced. Use of Dictionary.

DRAWING—Smith's Drawing Book, Nos. 6 and 7.

SECOND YEAR.

READING—Graded Fifth Reader. Select Reading, including Biographical Sketches.

ARITHMETIC—Robinson's Practical continued to Percentage.

GEOGRAPHY—Mathematical Geography. General Review of the World. Compare Climate, and Productions of Countries in the same latitude. Compare People of different Countries in regard to Enterprise, Religion and Government. Compare Nature and Man in the different Zones.

LANGUAGE.—Kinds and Properties of Verbs. Analysis of Simple Sentences and Parsing.

HISTORY—U. S. History in detail.

SPELLING—Swinton's Word-book continued.

DRAWING—Smith's Books, Nos. 8 and 9.

Lessons in Botany, Zoology and Minerals continued.

GENERAL INFORMATION.

This school, in the order of establishment the second in the State System of Normal Instruction, has been in successful operation fourteen years. Since its opening about 2,000 students have been enrolled in the Normal Department, and its graduates number 245. The year just closed has been decidedly the most prosperous in its history. With largely increased facilities the attendance of pupils has within three years nearly trebled. During this time the Faculty has been increased, a fine Library purchased, a Reading Room established, a water supply and large addition to the apparatus provided for the Laboratory, four additional rooms (previously unused) fitted up for the Practice School; and this latter department thoroughly reorganized, and, in the hands of accomplished teachers, made one of the most efficient in the country.

THE BUILDING.

The school building, built of brick and trimmed with stone, is spacious, well arranged in its interior, and tastefully finished. The three stories between the basement and the mansard roof afford ample room for the various departments. New furnaces and ventilating apparatus of the most approved character have just been placed in the building, and it is now confidently believed that in comfort and healthfulness the conditions will be all that can be desired—such, indeed, as can be found in few other institutions in the West.

LOCATION.

Mankato, the second largest city in Southern Minnesota, and having a population of about seven thousand, is pleasantly situated at

the great bend of the Minnesota river, at the northern line of the famed Blue Earth county. It is easily accessible from all quarters by lines of railway, being on the St. Paul & Sioux City, the Chicago, Milwaukee & St. Paul, and the Chicago & Northwestern roads. The second has recently extended its tracks into the midst of the city and erected a new depot but a few minutes walk from the school. Two new railroads are projected, and likely soon to be built.

The school building stands on a natural terrace, above the main portion of the city, and commands a magnificent view up and down the valley for many miles. In front, and about a mile distant, the lofty and wooded bluffs on the opposite side of the river somewhat resemble the Palisades on the Hudson, as seen from the east. The site of the city and the entire adjacent country was originally covered with a heavy growth of forest trees (hardwood), and the profusion of native trees still remaining, and the countless bluffs, valleys and ravines adjacent to the city, afford some of the most picturesque scenery to be found in the West. The drainage being perfect and no stagnant water possible, the city is one of the healthiest in the healthy State of Minnesota. No better location for a great State school could be found.

OBJECTS OF THE SCHOOL.

The *chief* purpose of the school is special instruction in the *Science and Art of Teaching;* but, as in nearly all other Normal Schools of the country, a thorough system of academic instruction is at once the basis, and, to some extent, the medium of professional instruction. In the absence of preparatory schools, few pupils come with sufficient attainments and intellectual discipline to qualify them for immediate entrance upon a purely professional course of instruction.

The school consists of two departments—the Normal and the Model Department. In the

NORMAL DEPARTMENT

there are two courses of study—one of three years, called the ELEMENTARY COURSE, and one of four years, known as the ADVANCED COURSE. Each course has recently been lengthened by the addition of one year, partly in order to remove from pupils the necessity of over-working, partly to secure fuller and more accurate scholarship and more effective professional training. The three years of the Elementary Course are designated respectively by the letters "C," "B" and "A." The four years of the Advanced Course are designated respectively "C," "B," "Junior" and "Senior." The studies of the two courses are identical the first year, and nearly so the second year, as will be seen on inspection of the full schedule of the courses given elsewhere.

CONDITIONS OF ADMISSION.

For admission to the "C" class, candidates are required to pass an examination in Arithmetic to Percentage, in General Geography and the Geography of the U. S, and in English Grammar as far as the parsing and analyzing of simple sentences. Candidates holding second grade certificates will be admitted at the opening of the Fall Term without examination.

Candidates are admitted to advanced standing in either course after successful examination in the studies completed by the class, or on evidence of diploma or certificate from an approved school. No one is entitled to graduation, however, without having been a member of the school for at least one year.

PREPARATORY DEPARTMENT.

For the benefit of those pupils who come unprepared to enter the "C" Class, a Preparatory Class is organized at the beginning of each school year. The studies of this class cover one year, and are designed to be a thorough preparation for the "C" class, meeting the needs of a large number of young people whose educational advantages at home have been necessarily limited. Pupils successfully completing the studies of this course are admitted to class "C," of

the Normal Department, without further examination. A tuition fee of four, six and five dollars respectively for the Fall, Winter, and Spring term is required from each preparatory pupil, payable strictly in advance—one-half at the beginning, and the remainder at the middle of the term.

MODEL SCHOOL.

The Model School consists of three grades—Primary, Intermediate and Grammar—and is designed to afford to Normal students ample opportunity for observation and practice. The plan is that of a thoroughly graded and classified school, with a course of study reaching from the simplest elements of school knowledge to full preparation for the Normal Department. Careful attention will be given to the conditions that promote the comfort, health and moral development of the children. The tuition is twenty cents a week in the Primary and Intermediate grades, and thirty cents a week in the Grammar grade. In each grade all needed text-books are furnished free.

CABINET AND APPARATUS.

The school is provided with good sets of Philosophical and Chemical Apparatus, Physiological Charts and Models, a Geological and Mineralogical Collection, and a fine collection of mounted specimens of the birds and quadrupeds of the State. These afford excellent material for illustrating the Natural Sciences, and are constantly available for use by the teachers in both the Normal and Model Department.

REFERENCE AND GENERAL LIBRARY.

During the past three years an addition of over six hundred dollars worth of reference books and works of standard literature has been added to the previous collection. The new selections have been made with great care, and the school now possesses not only an excellent reference library, but a good number of the best works in all departments of English literature.

Among the recent additions are the following: Wilkinson's Ancient Egyptians; Schliemann's Ilios; Schliemann's Mycenæ; Jowett's Plato; full set of Smith's Classical Dictionaries (unabridged); set of Sparks' American Biography; Freeman's Norman Conquest; Layard's Nineveh; Davis' Carthage; Draper's Intellectual Development of Europe; Lecky's History of Rationalism; Bancroft's History of the United States; Michaud's History of the Crusades; a set of Epochs of History; Brazil and the Amazons; set of Parkman's Works; Unbeaten Tracks in Japan; Guizot's History of France; Guizot's History of Civilization; Curtius' History of Greece; Mommsen's History of Rome; Hallam's Works; Gibbon's Rome; Skeat's Etymological Dictionary of the English Language; full set of Smiles' Works; Smith's Dictionary of the Bible (unabridged); Taine's English Literature; Wallace's Russia; full sets of Irving, Hawthorne, Dickens, Scott, Emerson, and Thackeray; English Surnames, Origin and Meaning; Lyell's Geology; Tyler's Early History of Mankind; Stanley's Through the Dark Continent; Nordhoff's Communistic Societies; Jevons' Money; Foster's Physiology; Field and Whipple's English Poetry; Wallaces' Island Life; Works of Herbert Spencer, Max Muller, Tyndall and Huxley; Quick's Educational Reformers; Fitch's Lectures on Teaching; and many other educational, biographical, historical and scientific works of scarcely less repute.

READING ROOM.

A valuable addition to the advantages of the school has recently been made in the opening of a Reading Room, supplied with much of the best periodical literature of this country and England. Never before has so great an amount of the world's best thought been directed to this channel of communication, and he who seeks to be a teacher must not be ignorant of the great "Gulf Stream" of contemporary history and intellectual activity constantly flowing into newspapers, magazines and reviews. The Reading Room is neatly carpeted, and furnished with chairs, settees, a long central table, and

the walls are adorned with pictures. The room is one of the most pleasant in the building, and will be open to students during the term at all hours, so far as consistent with their other duties. The following periodicals are now regularly received:

PROFESSIONAL.

The Pennsylvania School Journal; The Educational Journal of Virginia; The Wisconsin Journal of Education; The New England Journal of Education; The Primary Teacher; Education (bi-monthly); The Minnesota Journal of Education; The Kindergarten Magazine; The Teacher; The Boston Journal of Chemistry; The Naturalist's Leisure Hour; Appleton's Literary Bulletin; The Penman's Art Journal; The Musical Herald; The Musical Record.

MAGAZINES AND REVIEWS.

The Atlantic Monthly; The Century; Harper's Magazine; Popular Science Monthly; The Magazine of American History; The North American Review; The International Review; Blackwood's Edinburg Magazine; London Quarterly Review; Westminster Review; The Edinburg Review; The British Quarterly Review; The Contemporary Review; The Nineteenth Century; The Fortnightly Review.

NEWSPAPERS, ETC.

Harper's Weekly; Harper's Bazar; Harper's Young People; The Saint Nicholas; Youth's Companion; The Nation; The New York Semi-Weekly Tribune; The Independent; The Christian Union; The Chicago Weekly Journal; The New York Weekly Witness; The Daily Pioneer Press; The Mankato Review; The Mankato Free Press; The Owatonna Journal; The Skandinaven (Chicago); The American Agriculturist; The Country Gentleman; The Rural New Yorker; The Minnesota Farmer.

SOCIETIES.

The Normal Literary Society meets every alternate Friday evening, during the school terms, in the main assembly room of the building. During the past year it has had a large membership, and

its meetings have been sources of much interest and profit. It is managed exclusively by the students, subject to the approval of the faculty, and affords excellent opportunities for practice in public speaking and for acquiring familiarity with the proper management and conduct of deliberative assemblies.

Besides the above, there are three class societies, meeting every Wednesday afternoon, chiefly for extemporaneous debate, and these meetings have been during the past year a great benefit to a large number of pupils less qualified for active membership in the general society, or unable by reason of the large membership of the latter, to find there more than occasional opportunity for participation in its exercises.

EXPENSES.

Tuition is free to all students admitted into any of the regular classes in the Normal Department, provided they sign a pledge to teach two years in the public schools of the State, and to report semi-annually to the President until the pledge is fulfilled. Persons not willing so to pledge themselves will be received into the above classes on the payment of tuition at the rate of fifty cents per week for the term, payable strictly in advance, one half at the beginning and the other at the middle of the term. The tuition fees in the Preparatory Class and in the Model School have been already given.

The price of board, including furnished room, lights and fuel, is from $2.50 to $3.00 per week. Those desiring to board themselves can obtain rooms at very reasonable rates, and the expenses of such probably would not exceed $1.50 per week. This mode of economizing, however, cannot be recommended, as experience has generally shown it to be conducive neither to health nor to scholarship. *By boarding in clubs expenses may be reduced to two dollars per week*, and this plan is recommended to those who find the price of ordinary board beyond their means. A special effort will be made at the opening of the next school year to aid students in the formation of boarding clubs. New students on arriving in the city should come directly to the office of the President, where they will be furnished

with a list of boarding houses, rooms and club organizations, from which they can make selections.

All *enrolled* students can obtain *reduced fare on the three railroads entering Mankato*, at the close and beginning of terms, by obtaining from the President a proper certificate of attendance. This is issued at the close of the term and is of value only then and at the beginning of the next term.

In accordance with a resolution adopted by the State Normal Board all necessary text-books can be rented from the school. *The fee is* $1.00 *per term.* which also insures the privileges of the reference and miscellaneous library. Books from the latter are loaned to pupils for two weeks. Students are advised to bring for purposes of reference such text-books as they may happen to have. Those who prefer to purchase the text-books used can obtain them at the school at the lowest wholesale cost prices.

DISCIPLINE.

The discipline of the school is such as befits an institution for the training of teachers. While it is thorough it is based upon but few rules, and those only which must commend themselves to the judgment of all good students. Self-control as the essential preparation for controlling others, and orderly, quiet, studious habits for individual and the common benefit are asked from all. Those who are indisposed to respect its regulations are not desired in the school. It is not a reformatory institution, and is not dependent upon tuition fees or personal favor for its support. The pupil whose conduct is a source of persistent annoyance and disorder will be promptly dismissed.

TO SUPERINTENDENTS AND OTHER SCHOOL OFFICERS.

School officers are expected to feel a special interest in the State Normal School. They can materially aid the cause of public education by sending thereto, through suggestion, encouragement or information, such young people as they believe peculiarly qualified by nature for the work of teaching. Direct to the school only those who have sound health and good mental endowments.

In turn, the school is fully aware of its duty to school officers, and will endeavor to perform it to the extent of its ability. The President will cheerfully aid, so far as practicable, Superintendents and other officers in securing good teachers, whether graduates of this or of other schools.

CORRESPONDENCE.

All letters of inquiry will receive prompt attention.

Catalogues and circulars sent free on application.

ADDRESS

EDWARD SEARING, President,

Mankato, Minnesota.

STUDENT'S PLEDGE.

The following is the form of the pledge to be signed by those entering the Normal Department without tuition :

I————, of the Town of————, County of———— and State of Minnesota, being over fifteen years of age, do solemnly declare that it is my honest intention to attend this Normal School for one term or more for the purpose of fitting and qualifying myself to become a teacher in the Common Schools of this State for at least two years, and that I will faithfully attend this Normal School for one term, or more, for such purpose, and thereupon I will, to the best of my judgment and ability, teach in the Common, Graded or Normal Schools of this State for a period of two years, immediately after ceasing to be a student of such school.

And I further agree to report myself semi-annually, in writing, to the Principal of this Normal School for the period of two years after leaving such school, in case I enjoy its privileges for one term or more. Sickness or unavoidable cause only excusing me from the strict performance of this obligation.

Dated at Mankato this ——— day of ———— A. D. 18—.
